

# ProX10 Access Control Solutions Access Security & Monitoring Systems

## Key Function:

The ProX10 access control systems use a unique encryption technology to provide access control and monitoring in a wide range of locations including where traditional electronic locks can't be fitted, such as at barriers or lifts.

The solution is extremely cost-effective as only the primary entry point requires a direct computer connection; all other access points can operate off-line. This radically decreases the amount of cabling required, cuts installation disruption and hugely reduces the overall cost.

## Features

- Compatible with many card systems, including contactless smart cards and RFID
- Set-up can be centrally or locally controlled
- Ideal for external or internal use
- Easy to scale up, extend or upgrade
- Simple to cancel lost or stolen cards
- Alarmed door monitoring & panic bars available
- Remote door opening, including emergency use
- Request to Exit (RTE) switch
- Audit and monitoring information available

## Benefits

- Very economical solution, but still giving excellent security and monitoring capabilities
- Offers access control in locations where conventional systems don't work
- Minimal disruption to environment during installation
- Easy to use, manage, extend and upgrade
- Monitoring and auditing of access use is straightforward and comprehensive

MiFare wall reader

Wire-free electronic handle

## Specifications

Operating System	Windows Vista, XP, 98, 2000 Windows server 2003 or 2008	For SQL Version	MS-SQL server Express, or MS-SQL server 2005, MS-SQL server 2008
------------------	--	-----------------	--

## About ICS

**Integrated Card Solutions Limited (ICS) is the leading supplier of print & copy control products in the UK. ICS offer a wide range of intelligent software, biometric and card-based solutions, including the proprietary XPR Enterprise® range. Together, these provide a single solution for outstanding print and copy management services, access control, photo ID (including full card encryption) and many cashless applications.**

Established in 1996, ICS has a broad client base including 80% of all tertiary educational establishments in the UK, local government and NHS Trusts as well as many commercial enterprises.

**Using the ICS XPR Enterprise® range in conjunction with carefully selected partners, our solutions provide**

- Outstanding print and copy management
- Cashless environments including cash-on-card or account based systems
- Access Control
- Flexible Photo ID

These can be combined in a one-card solution, providing an easy-to-use, scalable and flexible system. Our clients report significant cost-savings after implementation, with enhanced management control and reporting

### **ICS print and copy management solutions**

- Can reduce your print costs by between 20% and 50%
- Provide control of how, when and where documents are printed
- Provide easy-to-use management reports.

In addition, ICS employ a talented team of software developers and have delivered customised solutions to organisation across the UK.

**Delivering the best solution for *your* needs, ICS work with the best partners and people from around the world.**
