

CCM8

Coin operated photocopier controller

- A self service coin operated payment system for photocopiers.
- Charge different prices for differing paper sizes and formats.

CCM8: Coin Operated Photocopier Controller

- The CCM8 is a robust and secure coin operated system for controlling photocopiers located in public access areas.
- The CCM8 is ideal for use by the general public, students and casual users.
- The CCM8 terminal is easy to operate and will accept all UK coins, from 2p to £2.
- This unit is capable of charging different prices for A3 and A4 copies, providing you with a complete break down of cost recovery for all photocopies taken.
- It has been designed to be totally self service with minimal impact on staff time as most users will not require assistance - it's that simple to use.

Operation

- To use the CCM8 unit you just insert the amount of coins required for the number of photocopies intended and proceed to take your photocopies as normal.
- An LCD display decrements the value as copies are taken giving clear advice of how many copies you have left with the amount of coins inserted.
- Setting and changing of pricing is simple using the security key and administration buttons.
- The CCM8 is able to charge different prices depending on the copies being done. Up to, 8 price lines can be maximised in some cases – this is photocopier and functionality dependent.
- Other functions included in the menus are Audit Data and Reset options.
- Menus are simple to access for auditing purposes and it's easy for users to scroll through the info contained.
- Audit information includes reset-able and non reset-able counters. Counters include copies, cash taken and copies done using the free vend key.
- It is also possible to read the counters using a laptop PC and a software utility.
- The security key can also be used as an override key for free vend if required.

Coins Accepted

- The CCM8 is capable of accepting seven denominations of UK coins including; 2p, 5p, 10p, 20p, 50p, £1 and £2.
- The CCM8 is also Euro Compatible.
- The CCM8 does not have the facility to give change or to provide refunds.

Connectivity

- A CCM8 can be connected to any make or model of photocopier currently available on the market.
- The number of price lines available is copier and interface dependent.

CCM8 Specification

Dimensions: 255mm x 180mm x 145mm.
