

# USB Mifare Reader: Read Mifare Cards in an Instant

The Mifare Card Reader has been designed to make the reading of Mifare Contactless Smart Cards as simple as possible, with a variety of different system applications.

#### System applications:

- Campus based student services
- Library systems
- Leisure membership cards
- Any PC based systems wanting to read a number from a Mifare card
- Self registration applications.

- The USB Mifare Card Reader has been specifically developed with simplicity in mind for the end user but is technologically advanced enough to be flexible in meeting customer requirements.
- The Mifare reader plugs directly into a USB connection. No extra Power supply is required.
- A Mifare card is placed within the "Read" zone of the reader. The Card number is then displayed on the PC. No additional software is required.
- ICS can also supply bespoke software packages for importing the card number into other software applications. Please contact ICS' head office on the details below for further information.

#### Readers are available as:

- Desktop
- USB Plug 4 Play
- Reading Unique Mifare ID number (Decimal Format)
- Reading a number from a specific Sector.

#### Reader Dimensions:

**Length** = 10cm    **Width** = 5.5cm    **Depth** = 3cm    **Weight** = 170g
