

MCD2 Recyclable Card Solutions for Pre-payment of Print & Copy Output

Key Function

The MCD2 product range offers the most advanced recyclable card solution currently available for the pre-payment of secure print or copy output.

MCD2 PRS is the pre-payment terminal of choice for secure network printing. It allows different tariffs to be set for different output formats. It is designed to work with the award-winning print & copy management software, Pcounter.

The MCD2 has been developed for easy pre-payment of photocopier output. This allows two different tariff levels and operates with any make or model of photocopier on the market. The MCD2 is standalone and doesn't require any complex software or network infrastructure.

MCD2 Terminal

Features

- At point of printing, the user releases print documents on demand, securely
- Uses durable and recyclable cards with encoded, secure magnetic strip on reverse
- Audit trail is available for allocation of funds to budget holders or cost centres
- Easy-to-read display of remaining value on card

Benefits

- Secure and very simple to administer and use
- Reduces waste, as only verified documents are printed

About ICS

Integrated Card Solutions Limited (ICS) is the leading supplier of print & copy control products in the UK. ICS offer a wide range of intelligent software, biometric and card-based solutions, including the proprietary XPR Enterprise® range. Together, these provide a single solution for outstanding print and copy management services, access control, photo ID (including full card encryption) and many cashless applications.

Established in 1996, ICS has a broad client base including 80% of all tertiary educational establishments in the UK, local government and NHS Trusts as well as many commercial enterprises.

Using the ICS XPR Enterprise® range in conjunction with carefully selected partners, our solutions provide

- Outstanding print and copy management
- Cashless environments including cash-on-card or account based systems
- Access Control
- Flexible Photo ID

These can be combined in a one-card solution, providing an easy-to-use, scalable and flexible system. Our clients report significant cost-savings after implementation, with enhanced management control and reporting

ICS print and copy management solutions

- Can reduce your print costs by between 20% and 50%
- Provide control of how, when and where documents are printed
- Provide easy-to-use management reports.

In addition, ICS employ a talented team of software developers and have delivered customised solutions to organisation across the UK.

Delivering the best solution for *your* needs, ICS work with the best partners and people from around the world.
