

Pcounter Advanced Print Control Software

Key Function

Pcounter software allows organisations to easily manage their print and copy output. Printing costs can be controlled, allocated to cost centres and accounted for. Waste is reduced or eradicated, giving significant cost savings.

Features

- Print monitoring and auditing
- Detailed reporting and analysis
- Secure, controlled release of printing
- Integration with card systems
- Allows quotas and print restrictions to be applied
- Supports e-payment or kiosk payment
- Rules-based printing
- Centralised accounting for print, copy and plotter

Benefits

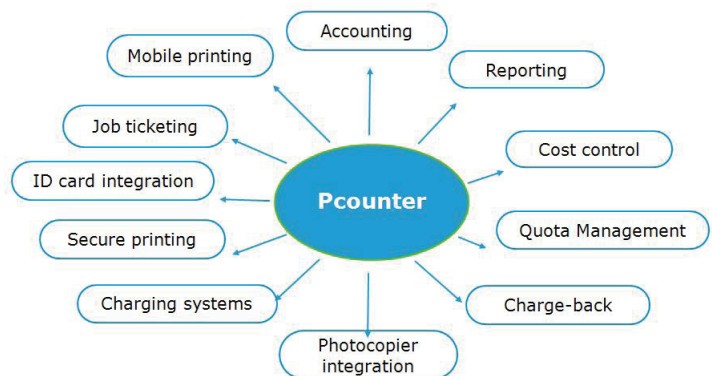

- Reduces unwanted printing
- Increases document output security
- Print and copy costs can be recovered and charged back to departments, projects or users
- Enforces company print and copy policy
- Produces full audit trail to assist policy decisions and promote cost awareness

Ideal for

- Education and academic establishments
- Local government and other public sector organisations
- Corporations, financial & professional institutions

Pcounter helps organisations significantly reduce waste, cut their carbon footprint and lessen their impact on the environment

Pcounter Software has recently been voted Environmental Product of the Year in the Network Computing Awards. It allows organisations to see exactly when, where, how and what is printed, giving them the power to manage their printing efficiently and cost-effectively. Our clients tell us they **save between 20-50%** on their print and copy budget within the first year.

About ICS

Integrated Card Solutions Limited (ICS) is the leading supplier of print & copy control products in the UK. ICS offer a wide range of intelligent software, biometric and card-based solutions, including the proprietary XPR Enterprise® range. Together, these provide a single solution for outstanding print and copy management services, access control, photo ID (including full card encryption) and many cashless applications.

Established in 1996, ICS has a broad client base including 80% of all tertiary educational establishments in the UK, local government and NHS Trusts as well as many commercial enterprises.

Using the ICS XPR Enterprise® range in conjunction with carefully selected partners, our solutions provide

- Outstanding print and copy management
- Cashless environments including cash-on-card or account based systems
- Access Control
- Flexible Photo ID

These can be combined in a one-card solution, providing an easy-to-use, scalable and flexible system. Our clients report significant cost-savings after implementation, with enhanced management control and reporting

ICS print and copy management solutions

- Can reduce your print costs by between 20% and 50%
- Provide control of how, when and where documents are printed
- Provide easy-to-use management reports.

In addition, ICS employ a talented team of software developers and have delivered customised solutions to organisation across the UK.

Delivering the best solution for *your* needs, ICS work with the best partners and people from around the world.
