

# SupervisorNet Transaction Management System

Monitor the value in your system by capturing all transactions with the sophisticated SupervisorNet Transaction Management System. SupervisorNet provides a simple user interface with a comprehensive database that captures transaction data for chargeable services. A multitude of reporting options are available, including browser based reports. A simple user interface manages department and user accounts, cost codes, pricing, terminal and system configuration.

## Benefits For Users

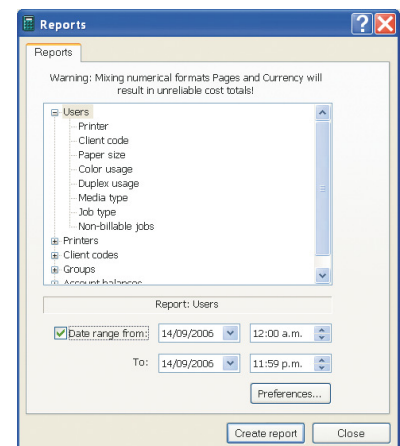

- Cashless self-service and 24 hour access to account balance
- Greater control by tracking actual versus budgeted expenditure
- Security through PIN protection
- Account value is protected if card is lost or stolen, as no value is stored on card
- Continuous off-line service capability during network failures
- Transaction history via browser based reports

## Benefits For You

- Effective cost allocation to cost centres and users
- Credit limit management
- Secure access, user authentication and credit valuation
- Centralised control of terminals
- Flexible and scalable architecture
- Easy administration through a friendly user interface
- Event monitoring, remote diagnostic and support capability
- Easily interfaces and synchronises data with third party control and accounting software
- Real-time transaction writing to third party RDBMS e.g. SQL Server, Oracle
- Accurate and real-time information assists decision making
- Integration with organisational redundancy and backup policies

## Flexible, Versatile & Dynamic

SupervisorNet is the core of a modular suite of applications, which comprise the Monitor Transaction Management System. A range of optional features and modules may be purchased at any time to suit your site requirements without loss of your initial investment. Being highly featured and easily configured, it allows customisation to suit your situation. It enables centralised control, site management and system configuration, allowing various devices to communicate with each other across an Ethernet network.

## About ICS

**Integrated Card Solutions Limited (ICS) is the leading supplier of print & copy control products in the UK. ICS offer a wide range of intelligent software, biometric and card-based solutions, including the proprietary XPR Enterprise® range. Together, these provide a single solution for outstanding print and copy management services, access control, photo ID (including full card encryption) and many cashless applications.**

Established in 1996, ICS has a broad client base including 80% of all tertiary educational establishments in the UK, local government and NHS Trusts as well as many commercial enterprises.

**Using the ICS XPR Enterprise® range in conjunction with carefully selected partners, our solutions provide**

- Outstanding print and copy management
- Cashless environments including cash-on-card or account based systems
- Access Control
- Flexible Photo ID

These can be combined in a one-card solution, providing an easy-to-use, scalable and flexible system. Our clients report significant cost-savings after implementation, with enhanced management control and reporting

### **ICS print and copy management solutions**

- Can reduce your print costs by between 20% and 50%
- Provide control of how, when and where documents are printed
- Provide easy-to-use management reports.

In addition, ICS employ a talented team of software developers and have delivered customised solutions to organisation across the UK.

**Delivering the best solution for *your* needs, ICS work with the best partners and people from around the world.**
