

# XPR Enterprise® Point of Sale Payment Solution: Reprographic Shops

## Key Function

XPR Enterprise® PoS is simple and easy-to-use software for charging individual users' accounts for reprographic services. It allows for variable tariffs to be set and controlled centrally. Charging directly to each user's account removes the requirement for cash to be handled or paperwork to be completed.

Ideal for any print or reprographic room where a wide range of services or products are offered; including such diverse items as laminating, binding, stationery or collation.

## Features

- Simple to use 'shopping cart' system, easy to view, amend, delete or add to its contents
- Variable tariffs - by user, department, volume, product or service
- User-specific shopping, for correct charging
- All transaction information is stored ready to be recalled & reported on as required

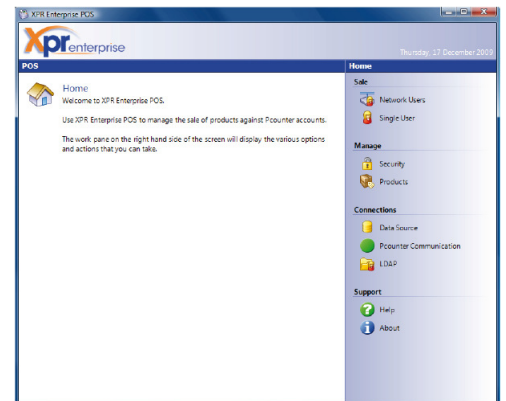

## Benefits

- Secure, cash-free solution
- Automated, centrally controlled tariff setting: eradicates operator charging errors
- When used with ICS XPR Enterprise® software, tailored audit reports are available for stock control & budget management

## Ideal for:

- Print or reprographic rooms
- Central stationery supply offices
- Stock management & control

Suitable for small and large sites, including: academic establishments, local government offices, financial & professional institutions or corporate offices.

## About ICS

**Integrated Card Solutions Limited (ICS) is the leading supplier of print & copy control products in the UK. ICS offer a wide range of intelligent software, biometric and card-based solutions, including the proprietary XPR Enterprise® range. Together, these provide a single solution for outstanding print and copy management services, access control, photo ID (including full card encryption) and many cashless applications.**

Established in 1996, ICS has a broad client base including 80% of all tertiary educational establishments in the UK, local government and NHS Trusts as well as many commercial enterprises.

**Using the ICS XPR Enterprise® range in conjunction with carefully selected partners, our solutions provide**

- Outstanding print and copy management
- Cashless environments including cash-on-card or account based systems
- Access Control
- Flexible Photo ID

These can be combined in a one-card solution, providing an easy-to-use, scalable and flexible system. Our clients report significant cost-savings after implementation, with enhanced management control and reporting

### **ICS print and copy management solutions**

- Can reduce your print costs by between 20% and 50%
- Provide control of how, when and where documents are printed
- Provide easy-to-use management reports.

In addition, ICS employ a talented team of software developers and have delivered customised solutions to organisation across the UK.

**Delivering the best solution for *your* needs, ICS work with the best partners and people from around the world.**
