

XPR Enterprise® Management Suite Reporting Package for Pcounter

Key Function

The XPR Enterprise® Management Suite is designed to provide sophisticated and versatile reporting on reprographic output. Reports, graphs, charts and tables can be tailored for any organisation's requirements, utilising its internal SQL database.

It is designed to work with and enhance the award-winning print & copy management software, Pcounter. Using this software helps reduce or eradicate printed waste, delivering significant cost savings.

Features

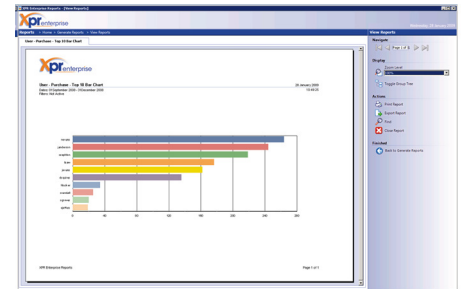

- Extensive, flexible management reports for tailoring to any organisation's requirements
- Bespoke graphical output easy: line, bar, chart
- SQL database drives management suite, providing full filtering functionality
- Customised report templates can be created
- Includes 'Transaction Builder' from ICS, which allows for complex costing, quoting and allocation of non copy/print costs to individual accounts
- Compatible with other ICS hardware & software, including touch screen kiosks, touchpad, PC206 and embedded software

Benefits

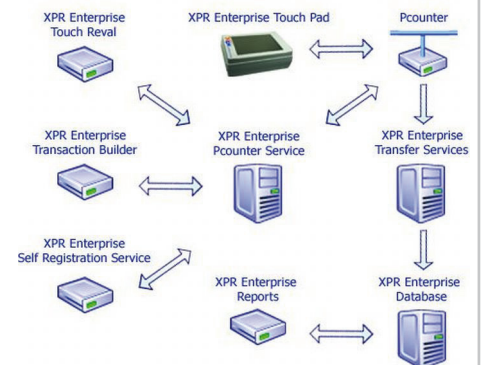

- Print & copy costs can be recovered and charged back to departments, projects or users
- Enforces company print and copy policy
- Management audit reports are easy to create, interpret and use
- Complex print, production & copy costs can be simply calculated and quoted

Ideal For

- Education and academic establishments
- Local government, libraries and other public sector organisations
- Corporations, financial & professional institutions

About ICS

Integrated Card Solutions Limited (ICS) is the leading supplier of print & copy control products in the UK. ICS offer a wide range of intelligent software, biometric and card-based solutions, including the proprietary XPR Enterprise® range. Together, these provide a single solution for outstanding print and copy management services, access control, photo ID (including full card encryption) and many cashless applications.

Established in 1996, ICS has a broad client base including 80% of all tertiary educational establishments in the UK, local government and NHS Trusts as well as many commercial enterprises.

Using the ICS XPR Enterprise® range in conjunction with carefully selected partners, our solutions provide

- Outstanding print and copy management
- Cashless environments including cash-on-card or account based systems
- Access Control
- Flexible Photo ID

These can be combined in a one-card solution, providing an easy-to-use, scalable and flexible system. Our clients report significant cost-savings after implementation, with enhanced management control and reporting

ICS print and copy management solutions

- Can reduce your print costs by between 20% and 50%
- Provide control of how, when and where documents are printed
- Provide easy-to-use management reports.

In addition, ICS employ a talented team of software developers and have delivered customised solutions to organisation across the UK.

Delivering the best solution for *your* needs, ICS work with the best partners and people from around the world.
