

XPR Enterprise® - SecurePrint Secure & Quick Print Release

Key Function

XPR Enterprise® SecurePrint is a safe and secure way to control print queues. Its 'simple-to-use' technology ensures documents sent to the printer cannot be read, go astray or get mixed up with other print jobs.

It is quick and easy to use. All printed jobs are held in a 'queue' until the release to print is authorised by either the sender's swipe-card, ID badge or biometric signature.

Award-winning software

XPR Enterprise® SecurePrint is designed to work with the award-winning print & copy management software, Pcounter and XPR Enterprise® Management Suite. Using this software helps reduce or eradicate printed waste, giving organisations significant cost savings.

Features

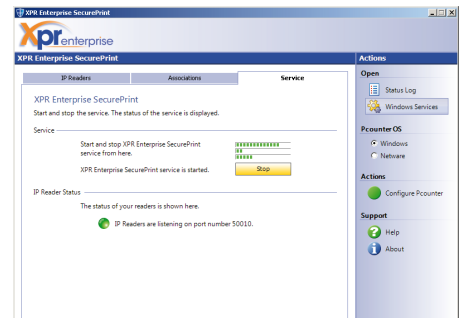

- Quick and Easy to install
- Simple to use
- Compatible with many card systems including magnetic stripe ISO standard, HID and MIFARE™
- Discreet card reader for printer or multi-functional device
- Biometric fingerprint scanner option available

Benefits

- Secure printing - only outputs to the printer on instruction by the authorised user
- Works with local and networked printers
- Compatible with all printers and most card systems
- Integrates with other ICS software, providing tailored audit reporting

Ideal for:

- Education and academic establishments
- Local government and other public sector organisations
- Corporations, financial & professional institutions

XPR Enterprise® Secureprint Service

About ICS

Integrated Card Solutions Limited (ICS) is the leading supplier of print & copy control products in the UK. ICS offer a wide range of intelligent software, biometric and card-based solutions, including the proprietary XPR Enterprise® range. Together, these provide a single solution for outstanding print and copy management services, access control, photo ID (including full card encryption) and many cashless applications.

Established in 1996, ICS has a broad client base including 80% of all tertiary educational establishments in the UK, local government and NHS Trusts as well as many commercial enterprises.

Using the ICS XPR Enterprise® range in conjunction with carefully selected partners, our solutions provide

- Outstanding print and copy management
- Cashless environments including cash-on-card or account based systems
- Access Control
- Flexible Photo ID

These can be combined in a one-card solution, providing an easy-to-use, scalable and flexible system. Our clients report significant cost-savings after implementation, with enhanced management control and reporting

ICS print and copy management solutions

- Can reduce your print costs by between 20% and 50%
- Provide control of how, when and where documents are printed
- Provide easy-to-use management reports.

In addition, ICS employ a talented team of software developers and have delivered customised solutions to organisation across the UK.

Delivering the best solution for *your* needs, ICS work with the best partners and people from around the world.
